

5G: What Comes Next!

November 15th & 16th, 2021

NOVEMBER 15TH & 16TH, 2021

The background of the slide features abstract, flowing light trails in shades of blue and green, creating a sense of motion and technology. These trails are concentrated at the top and bottom edges, framing the central text area.

Each year we bring together the companies at the forefront of innovation and investment in 5G to tackle the big questions facing the ecosystem.

We draw out the technology companies creating the capabilities that will power the 5G ecosystem, the carriers and infrastructure companies building the networks that will bring those capabilities to consumers and enterprises, and the innovators developing the applications that will ride on the networks and make them sing.
